

Corporate Screensaver

Sabercom's corporate screensaver is a great way to communicate with desk based employees. Our corporate screensaver works in the same way as any ordinary PC screensaver, but with the added functionality of content management, targeted messaging and interactive web links—all controlled from your desk via a web browser.

Stand-alone Communications Channel

Sabercom's corporate screensaver is an internal communications channel that runs outside the usual email traffic. A powerful way to raise awareness and communicate campaigns.

100% Visibility

In a room full of PCs there will always be screens in screensaver mode. You are guaranteed 100% visibility of any messages. With this level of exposure the Sabercom corporate screensaver is an integral part of your internal communication programme.

Dynamic Content

Means you decide what is shown on employees PCs with a mix of content that can include intranet and web links, PowerPoint, images and scrolling text.

Fully Interactive

All browser links can be clicked to take readers directly to web and intranet pages for more information.

Content Management

Content can be updated by anyone using our web based content management system and all updates are automatically shown on employees PCs when the screensaver next starts.

Targeted Distribution

If you have specific content for different departments it can be pushed to the targeted audience across multiple sites.

Simple Installation

Minimal input required by your IT department. A one time roll out of the screensaver makes implementation easy.

Cost Effective

Method of reaching all employees. Save on print and cut down on email traffic.

Features:

Digital signage is a great way to engage and communicate with employees, here's what we can help you achieve...

- Inform employees about corporate events
- Reinforce core values
- Communicate important corporate information
- Reinforce brand and corporate identity
- Reward employees with incentives
- Communicate health and safety information
- Share company success stories
- Nurture a team environment
- Communicate recognition of company and staff achievements

The Sabercom software is easy to use and allows the updating of our screensavers using our own corporate brand and content or nationally prepared materials in various formats. On the occasions when technical support has been required the team were always very helpful and have an excellent knowledge of their system and provide guidance in an easy to understand way

Toni Carlile – Communications Manager, Burton Hospitals NHS Foundation Trust
