

With Sabercom's reception screen solution you don't have to be stuck with the same TV news channel. You can move the TV channel to one side and add in images, Videos, RSS Feeds, PowerPoint presentations and welcome messages, all from your own PC.

A combination of compelling and eye catching information makes your reception screen the first point of contact. Great for employee announcements as they walk through the door, and an excellent marketing opportunity for visitors.

If you don't already have a reception screen Sabercom offer a complete installation package that includes a screen, PC and pre-installed Sabercom software.

Our reception screen software can also be the basis for a company wide digital signage system, linking floors, departments, buildings, and even countries with targeted, engaging, brand compliant information.
